

# Tattoo Aftercare

1. Remove bandage within a couple hours, and wash with warm water and soap. Pat dry with clean paper towel, and apply a thin film of Eucerin Aquaphor, remove any excess with clean, dry paper towel.

2. Wash tattoo twice daily while healing and use "Tattoo Care Butter" or "Tattoo Care Lotion", as needed to prevent dryness. It is fine to wash in the shower or tub but do not allow to soak.

3. Do not pick or scratch any scabbing, allow it to come off on its own. Scabbing usually flakes off in 7-10 days. Keep clean and continue to use butter or lotion until healed. Wear clean, loose clothing to protect tattoo while healing.

4. DO NOT expose healing tattoo to sun, swimming, hot tub, unclean conditions, irritating clothing, or anything that may hinder healing.

5. Once tattoo is healed, use high SPF sunblock when exposed to sun. *Screaming Ink Tattoo*
